# HELPING TO PROTECT against coronavirus

roller | vertical | panel

It is essential to make areas where people gather as safe as possible and protect against the spread of coronavirus.

Louvolute offers an additional layer of security with the introduction of Louvolute CoronaSafe™ treated Carnival and Carnival Blackout fabrics.

The unique formula offers proven protection eliminating 99% of coronavirus from the fabric's surface within an hour. An hour! A tremendous result when, according to the internationally recognised medical journal, The Lancet, cloth can retain the virus for up to 2 days.

Where extra protection is needed, in hospitality, offices, care homes, healthcare sectors, schools, nurseries and in the home, use Louvolute CoronaSafe™ window blinds.

Available now in a wide range of colours as light filtering and blackout fabric, make Coronasafe Carnival and Carnival Blackout fabric your number one choice. Why would you use anything else?

Vertical Blind

## independently tested

Currently, the strain related to the pandemic poses a significant threat to people handling it outside of high-level research laboratories - it is therefore not available commercially for use in public test laboratories. In this case and like other outbreaks, such as SARS and EBOLA, the testing industry use a suitable surrogate to represent the target strain that would have representative results of a product's performance.

To test against coronavirus the independent testing laboratory uses feline coronavirus as a surrogate organism, as it poses no risk to staff and shares a strong family design to the outbreak strain with only small differences in RNA. It's currently used in other EN methodologies and has been tested in ring trials, proving to provide reliable and repeatable results.

This allows the test teams to confirm that any result on feline coronavirus would be representative of the results achieved on the pandemic strain, if it was tested, and that they are repeatable by other laboratories.

A modern living room with large windows covered in bright orange roller blinds. A white sectional sofa is decorated with orange and white pillows and a patterned throw. A white coffee table with a silver frame sits on a striped rug. In the background, a bar area with white stools is visible.
