

How to fit Wooden blinds

1 During the ordering process, you will have selected either 'inside recess' or 'outside recess' measurement's.

outside recess - face fix brackets

inside recess - top fix or face fix brackets

2 **Brackets**

There are 2 different brackets available for wooden blinds, swivel brackets (available in top-fix and face-fix) and cage brackets.

Follow the instructions for the brackets that you received with your blinds.

swivel bracket

top fix top fix & face

cage bracket

top fix & face

3 **Swivel Bracket**

These brackets can fit anywhere along the blind.

Slide the bracket in to the head rail and then swivel the bracket arm clockwise to lock the blind in position

turn clockwise to lock bracket in position

4 **Cage Bracket**

These brackets come in a pair, one for each end of the blind.

The brackets can be fitted using any of the holes.

In the box

or

x1 

Tools

Suggested

screwdriver
drill (5mm)
pencil
tape measure
spirit level
screws
wall plugs

Your blind should come with a child safety device which must be screwed into the wall during the installation of the blind to prevent the cords/chains creating a loop. Failure to fit this device could result in strangulation.
