

### Recess Size

( for fitting inside the window recess )

- . Measure width at top of recess where the roller blind is to be fitted.
- . Do not deduct anything off this size, we will make the blind to fit within this recess.

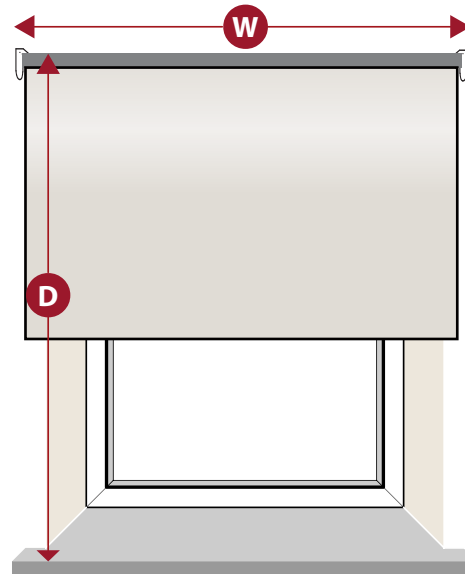

N.B. Roller blind fabric is always approx 30-35mm narrower than the bracket to bracket size.

### Bracket to Bracket Size

- . Choose if you are measuring an existing blind from 'bracket to bracket'.

N.B. Roller blind fabric is always approx 30-35mm narrower than the bracket to bracket size.

### Fabric Size

- Choose 'fabric size' if you are measuring the fabric on an existing blind or if you want the fabric to be a specific width.

N.B. The finished bracket to bracket size of the blind will be approx 30-35mm wider than the fabric width.
